ABOUT

Hire a Remote Full Stack Developer

Trusted by startups, agencies and SaaS companies across the USA, UK, Europe & worldwide.

I'm **Deep Vasoya**, a remote software engineer with 5+ years of experience delivering web applications, SaaS platforms, REST APIs, and mobile apps for clients around the world. From startups in California to agencies in London and SaaS companies in Berlin — I build production-ready software that scales.

I specialize in **AI/ML integration**, **SaaS development**, **API design**, **cloud deployment** (AWS, GCP, Azure), **workflow automation**, and **mobile app development**. Whether you need a custom CRM, e-commerce store, AI chatbot, multi-tenant SaaS platform, or enterprise dashboard — I handle frontend, backend, database, and DevOps end to end.

Verified 5-star reviews on Fiverr. Transparent pricing, weekly progress updates, NDA-friendly contracts, and flexible communication via Slack, Zoom, or email, with US/EU time zone overlap available.

Fast Delivery

Clear milestones and weekly progress updates.

Clean Code

Maintainable, well-documented, production-ready.

Direct Access

Work with me directly — no account managers.

Full Stack Development Services

Professional remote development services — from MVP to enterprise-scale platforms, with clean code, on-time delivery, and long-term support.

01

Web Application Development

Scalable, secure web applications with RESTful APIs and database-driven portals using MySQL, MongoDB & PostgreSQL.

02

Responsive Web Development

Pixel-perfect, SEO-optimized, and lightning-fast websites and dashboards built with Next.js, React & Vue.js.

03

Web & API Development

RESTful APIs and backend architectures for mobile apps, web platforms, and third-party integrations.

04

E-Commerce Development

Custom online stores with secure payment gateways, product management, and optimized shopping experiences.

05

Custom Software Solutions

Internal tools and SaaS platforms tailored to your business, from complex requirements to easy-to-use systems.

06

Cloud & DevOps Integration

AWS, DigitalOcean or Linode deployments with CI/CD pipelines, server management, and cloud architecture.

07

Maintenance & Support

24/7 monitoring, updates, bug fixes, security patches, and performance optimization.

08

SaaS Development

Multi-tenant SaaS applications built with Next.js and Python, with subscription management and secure API integration.

09

AI & Automation

AI-powered chatbots, content generation, and intelligent automation using Python, OpenAI, LLMs & machine learning.

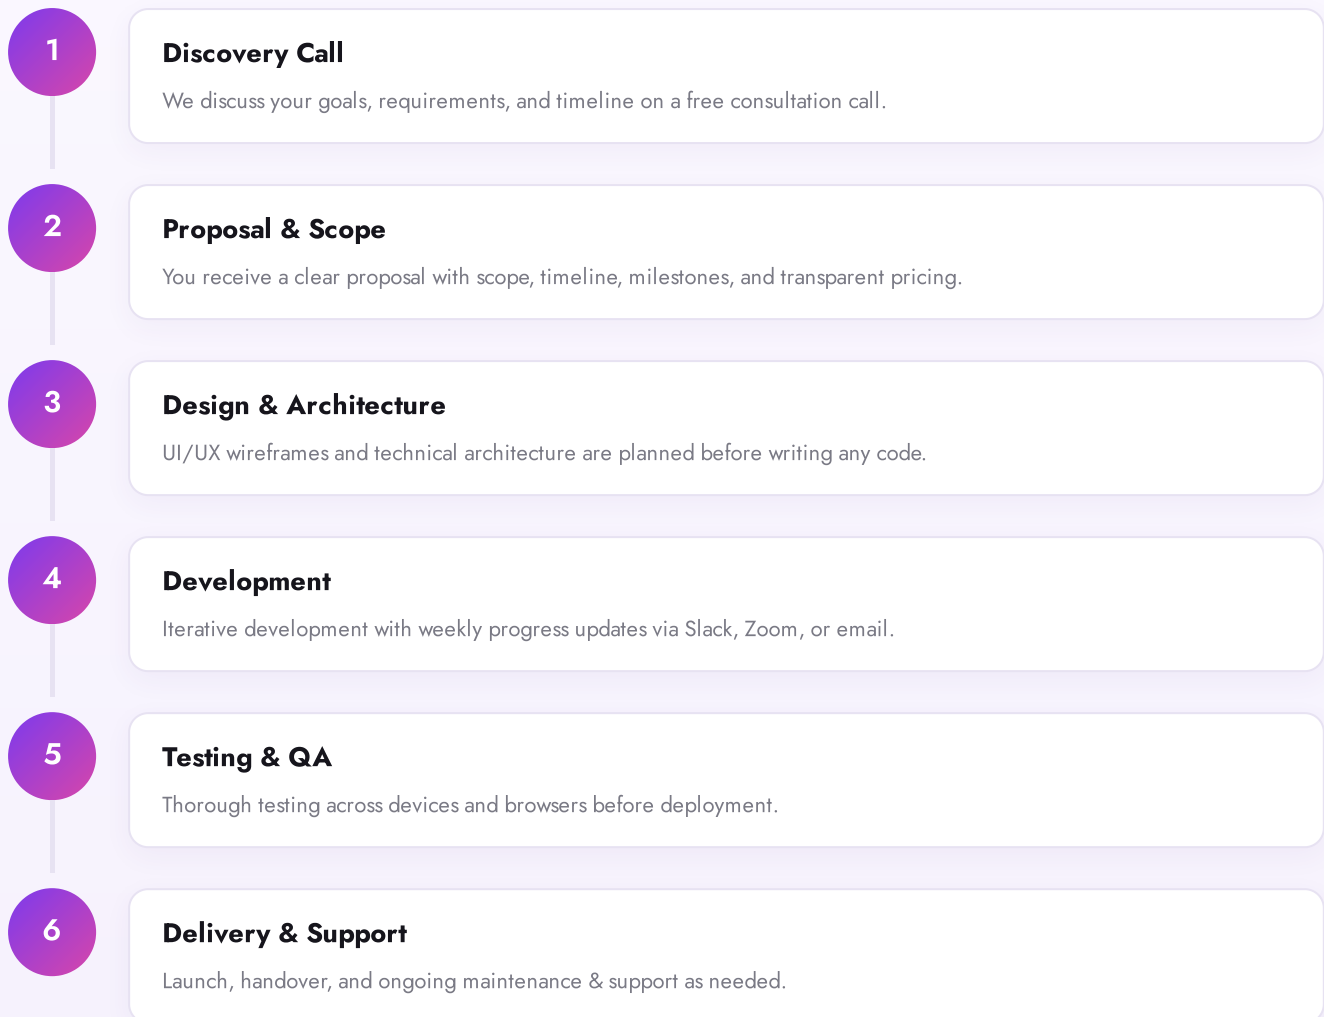

10

Mobile App Development

Cross-platform iOS & Android apps using React Native and Flutter, from MVP to full-scale applications.

How We'll Work Together

A clear, transparent process from first conversation to long-term support.

SKILLS

Technical Skills & Expertise

A modern, battle-tested technology stack for scalable web development and AI solutions.

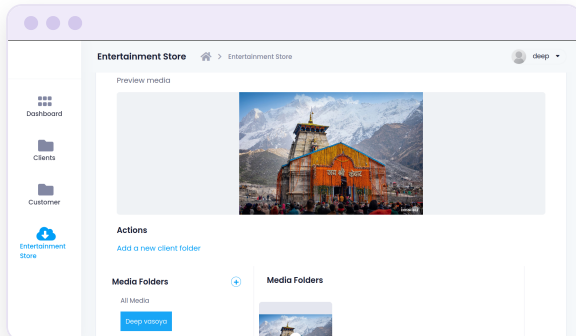

TECHNOLOGY STACK

CASE STUDIES

Featured Project Case Studies

A closer look at real projects delivered — problem, solution, and technology used.

CASE STUDY 01

E-Commerce Platform with Payment Gateway

Built a full-featured online store with product management, user accounts, and secure checkout — reducing cart drop-off with a faster, mobile-optimized flow and integrated payment gateway.

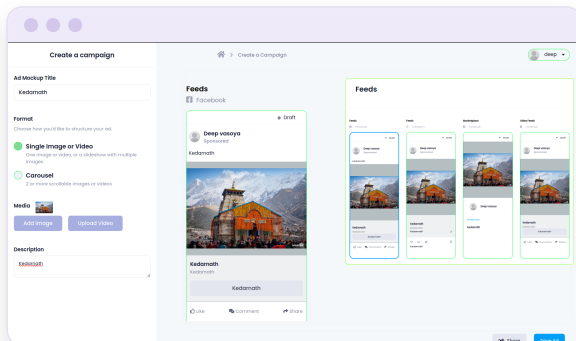

Next.js

React

Node.js

Stripe

MongoDB

CASE STUDY 02

Multi-Tenant SaaS Platform

Designed and shipped a scalable SaaS product for business data management, with subscription billing, role-based access, and a Python-powered automation layer behind a modern Next.js frontend.

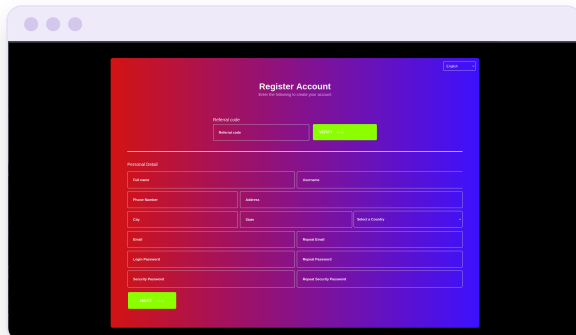

Next.js

React

Python

PostgreSQL

AWS

CASE STUDY 03

Online Learning Platform

Delivered an e-learning application with interactive video lessons, quizzes, user dashboards, and digital certificates — built for scale with a React-based frontend and Python backend services.

React

Next.js

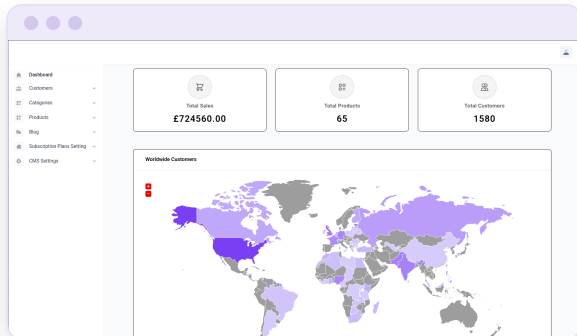

Python

Node.js

MongoDB

Digital Growth, IoT & AI-Powered Projects

More projects delivered — from business growth platforms to IoT device tracking and AI-driven automation.

CASE STUDY 04

Digital Growth & Analytics Platform

Built a business analytics dashboard to track growth KPIs, marketing funnels, and customer engagement in real time — helping the client make faster, data-driven growth decisions.

Next.js

React

Python

PostgreSQL

AWS

The screenshot shows a cryptocurrency tracking dashboard. It features a search bar at the top with a green 'Filter' button. Below the search bar is a table with columns: ID, ICON, NAME, SYMBOL, DEPOSIT ADDRESS, WITHDRAWAL ADDRESS, and ACTIONS. The table lists three cryptocurrencies: Bitcoin (BTC), Ethereum (ETH), and Bitcoin Cash (BCH). Each row has a green checkmark and a trash icon in the ACTIONS column.

ID	ICON	NAME	SYMBOL	DEPOSIT ADDRESS	WITHDRAWAL ADDRESS	ACTIONS
1		Bitcoin	BTC	0230450224	0230450224	
2		Ethereum	ETH	0E73045022	0E73045022	
3		Bitcoin Cash	BCH	0E73045022	0E73045022	

CASE STUDY 05

IoT Device & Inventory Tracking Platform

Developed a real-time device and stock tracking system connecting IoT sensors to a live dashboard — giving the client instant visibility into device status, stock levels, and order fulfillment.

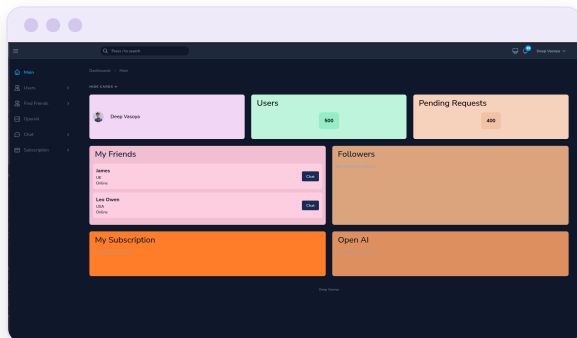

Node.js

React

MQTT

MongoDB

AWS IoT

CASE STUDY 06

AI Chatbot & Customer Automation

Built an AI-powered chat and support automation system using OpenAI & LLMs, reducing response time and automating repetitive customer queries with real-time messaging and history tracking.

Next.js

React

Python

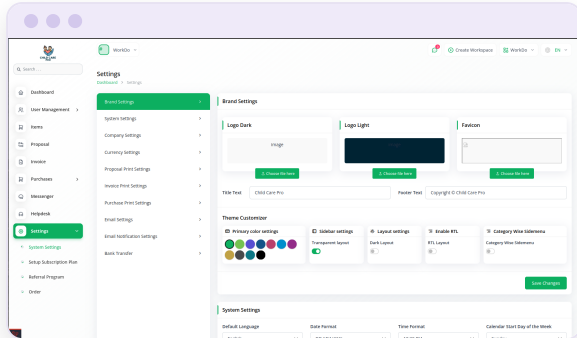

OpenAI

LangChain

CASE STUDIES (CONTINUED)

More AI-Powered Solutions

Additional AI & automation projects delivered for clients worldwide.

CASE STUDY 07

AI-Powered SaaS Automation Platform

Delivered a multi-tenant SaaS platform with AI-assisted scheduling and record management, automating manual admin work and reducing staff workload through intelligent recommendations.

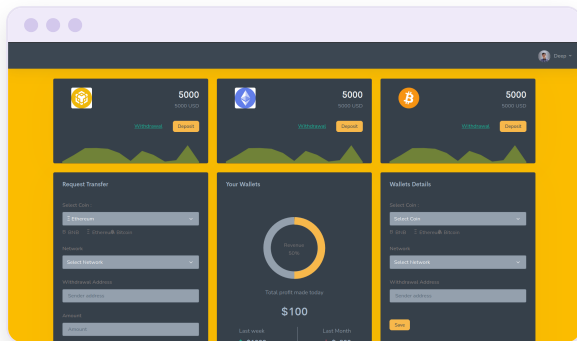

Next.js

React

Python

OpenAI

PostgreSQL

CASE STUDY 08

AI Recommendation & Personalization Engine

Implemented an AI-driven recommendation engine for a delivery platform, personalizing listings and offers per user to increase order value and repeat engagement.

React

Python

TensorFlow

Node.js

Redis

More Selected Work — 60+ Projects Delivered

A snapshot of additional projects delivered for clients worldwide.

Custom CMS

Powerful custom content management system built for flexibility and ease of use.

Business Analytics Dashboard

Real-time analytics dashboard with data visualization for business decision-making.

Custom CRM System

End-to-end CRM for managing leads, clients, and sales pipelines.

Real-Time Chat Application

Real-time messaging app with sockets, notifications, and media sharing.

Task Management System

Collaborative Kanban-style tool with deadline reminders and real-time updates.

Food Delivery Application

Mobile-friendly food ordering platform with live order tracking and payments.

Event Management System

Scheduling, ticketing, attendee registration, and analytics for organizers.

Social Networking App

Full-stack social platform with real-time chat and multimedia sharing.

What Clients Say

Verified 5-star reviews from clients across the globe.

"Outstanding full stack developer. Built our API and React dashboard with zero bugs on launch. Professional, responsive, and easy to work with across time zones."

— Verified Client, Fiverr

"Deep delivered our SaaS MVP ahead of schedule with clean, well-documented code. Great communication throughout the project."

— Verified Client, Fiverr

"Highly recommended for AI integration work — implemented our chatbot and automation workflows exactly as specified."

— Verified Client, Fiverr
